Homework 5 due 2/20/18

Posted Feb 13, 2018 4:33 PM

You do not need to submit any code. The qq-plot mentioned below must be printed and turned in with your homework.

8.59
8.73
8.81 (Use R to find mean and SD, and have R draw a normal qq-plot with a qq-line. Assume a normal population regardless.)
8.83 (for part (a), assume equal population variances, for part (b), assume unequal population variances, assume all populations normal)
8.96 (Again assume a normal population)
